

University of the Philippines, Diliman
College of Engineering
Department of Computer Science

Course Information

Course Number:	CS 180
Course Schedule:	TTh 2:30 - 4:00
Course Title:	Introduction to Artificial Intelligence
Course Description:	An introduction to basic concepts in artificial intelligence and machine learning techniques
Credit:	3 units
Prerequisite:	CS 32
Methodology:	In-class lectures, machine projects
Instructor:	Kristofer E. delas Peñas
Consultation:	TTh 10-12, W 12-6, Rm. 307, UPAECH
Email Address:	kedelaspenas@up.edu.ph

Course Goals

At the end of the course, the student should be able to:

- Understand some basic techniques and concepts in modern AI
- Apply AI algorithms in solving practical problems

Course Outline

1. Overview of Artificial Intelligence
2. Problem Solving
3. Game Solving
4. Machine Learning
5. Statistics, Uncertainty, and Bayesian Networks
6. Decision Trees
7. Hidden Markov Models
8. Artificial Neural Networks
9. Support Vector Machines
10. Other Topics*

Course Requirements

- Quizzes/Problem Sets (10%)
- 2 Long Exams (40%)
- 4 Machine Exercises (50%)

Class Policies

- **Collaboration**
Students are allowed to informally collaborate on their assignments, exercises and machine problems with other students who have taken the course previously or are currently taking the course. Submitting code copied verbatim or nearly verbatim even with proper citation is prohibited unless otherwise specified by the instructor.
- **Consultation**
Consultation is encouraged. A student who wants to consult should inform the instructor at least a day before his/her preferred day of consultation.

- **Loss of Work**

Students should make backup copies of all their work in this course. Loss of work due to hardware failure will not be considered as an acceptable excuse for late submission or non-submission of requirements.

- **Previous Work**

Students are free to use programs they have written in the past provided they follow the required format and are authorized by the instructor.

- **Cheating**

Any instance of copying the works and/or thoughts of others and passing it as one's own is considered as plagiarism. In using course materials, students should be careful not to claim words, ideas and algorithms as one's own.

Grading System

Students will be graded according to the following scale:

General Average	Final Grade
[92 - 100]	1.0
[88 - 92)	1.25
[84 - 88)	1.50
[80 - 84)	1.75
[76 - 80)	2.00
[72 - 76)	2.25
[68 - 72)	2.50
[64 - 68)	2.75
[60 - 64)	3.00
[0 - 60)	5.00
